

Supply Chain Law -
Compliance of Human rights

The supply chain law passed by the German Bundestag (parlament) does not apply to our company. The law is only applicable to companies that either have 3 000 employees (in 2023) or 1 000 employees (from 2024).

Regardless of this, however, as part of our corporate compliance, we ensure that comparable benchmarks and standards are adhered to. We also ensure that the legal interests protected by the Supply Chain Act (in particular human rights) are not violated, of course not by ourselves, but also not by our suppliers.

If we become aware of violations of these legal interests by our suppliers, we will take up and clarify this, if necessary break off the supply relationship with the supplier concerned.
