

JADE 1000

Our product JADE 1000 is a **weakly acidic, ammonium-free zinc/nickel system** complying with the automotive standards in every respect.

Advantages of JADE 1000:

- Suitable for rack and barrel applications
- Homogeneous nickel deposition rates over the entire current density range
- High brilliance coatings, deformable and flake-free
- Good seeding on cast parts and hardened materials
- High coating hardness and good abrasion resistance
- Very high corrosion resistance and good adherence
- Low foam development when air is injected
- During operation the system works with only 2 dosing units
