

PROSEAL Additiv Y

The PROSEAL Additiv series is a **colour system for our passivations** specially developed for high corrosion protection of zinc and zinc alloys as well as for highly economical production processes.

Advantages of PROSEAL Additiv Y:

- Additive for our PROSEAL XZ 111, 113 or 500 for zinc and zinc-iron layers
- Very good yellow colouring (from yellow to golden yellow/red iridescent)
- Economical way of working due to low additive concentration
- Little zinc introduction due to high pH value, hence long service lives
- As a result of subsequent sealing the yellow colouring does not fade
- The product is naturally and hence easy to handle

Working conditions	Zinc	Zinc-iron
PROSEAL XZ 111, 130 or 500	10 – 12 %	10 – 12 %
PROSEAL Additiv Y	1 – 2 %	1 – 2 %
pH-value	2,5 – 3,2	2,5 – 3,2
Temperature	25 – 40 ° C	25 – 40 ° C

Also find out about other products from our product portfolio, e.g. AZUR (acid zinc), TOPAS (alkaline zinc / zinc-iron), OPAL (alkaline zinc-nickel), JADE (acid zinc-nickel) and the SURFASEAL series (sealings).
