

## AZUR HT 5

Our product AZUR HT 5 is a weakly acid zinc electrolyte without ammonium, AOX and highly flammable substances and meets the usual automotive standards.

### Advantages of AZUR HT 5:

- The bath works continuous operation with only two additives.  
It is also possible to supply a ready to use mixture.
- Extraordinarily high turbidity point.
- Suitable for barrel and rack application.
- Ductile layers with a high degree of gloss, good levelling and outstanding throwing power are deposited.
- Stable process with low sensitivity against iron impurities.
- Low foaming with air injection.

Also obtain information about other products from our product portfolio, e.g. TOPAS 4100 (alkaline zinc or zinc-iron), OPAL (alkaline zinc-nickel), JADE (acid zinc-nickel), our PROSEAL series (passivation systems) and the SURFASEAL series (sealings).

For any further questions our competent field staff is at your disposal.
