

TOPAS 3100

Our product TOPAS 3100 is an **alkaline** zinc system that can of course also be operated as a zinc-iron electrolyte.

Advantages of TOPAS 3100:

- Adjustable gloss (industrial to high gloss).
- Excellent layer thickness distribution and gloss throwing power.
- High efficiency in continuous operation.
- Low-tension deposits, hence no spangling.
- The bath works in continuous operation with two additives only.
- Can of course also be operated as a Zn/Fe electrolyte.
- The deposits can be passivated well.

Also obtain information about other products from our product portfolio, e.g. OPAL (alkaline zinc-nickel), JADE (acid zinc-nickel), TOPAS (alkaline zinc or zinc-iron), our PROSEAL series (passivation systems) and SURFASEAL series (sealings).

For any further questions our competent field staff is at your disposal.
