

PROSEAL XZ 140

The PROSEAL series is a very economical passivation system specially developed for the high corrosion protection of zinc and zinc alloys.

Our PROSEAL XZ 140 is a thick-layer passivating agent with a reduced cobalt content with very high corrosion protection that meets the usual automotive standards.

Advantages of PROSEAL XZ 140:

- High-performance passivation for acid and alkaline zinc
- Colour shade adjustable, depending on concentration, from blue to iridescent
- Stable even in the case of a high degree of contamination by foreign metals
- Economical way of working due to low make-up concentration
- Can be used with our PROSEAL Additiv Y bzw. PROSEAL Additiv Black, also as Cr (VI)-free yellow passivation agent and/or Cr (VI)-free black passivation agent

Obtain information also about further products from our product portfolio, e.g. OPAL (alkaline zinc-nickel), TOPAS 3100 (alkaline zinc and/or zinc-iron) and our PROSEAL series (passivation systems).

Should you have any further questions, our competent field service will be at your disposal.
