

PROSEAL XZ 150

The PROSEAL series is a very economical passivation system developed specially for the high corrosion protection of zinc and zinc alloys.

Our PROSEAL XZ 150 is a thin-layer passivation system containing cobalt and temperable with a stable colour shade and very high corrosion protection after the tempering process that meets the usual automotive standards.

Advantages of PROSEAL XZ 150:

- Temperable and colour-stable passivation agent for acid and alkaline zinc
- Blue colour shade stable even after tempering process (8 h / 220°C)
- Stable even in the case of a high level of contamination by foreign metals
- Integrated iron inhibitor
- Economical way of working due to low make-up concentration

Obtain information also about further products from our product portfolio, e.g. OPAL (alkaline zinc-nickel), TOPAS 3100 (alkaline zinc and/or zinc-iron) and our PROSEAL series (passivation systems).

Should you have any further questions, our competent field service will be at your disposal.
