

PROSEAL XZ 180

The PROSEAL series is a very economical passivation system specially developed for high corrosion protection of zinc and zinc alloys.

Our PROSEAL XZ 180 is a thick-layer passivation agent containing cobalt, having a yellow colour shade and very high corrosion protection, that meets the usual automotive standards.

Advantages of PROSEAL XZ 180:

- Yellow passivation agent for acid and alkaline zinc
- Yellow colour shade, alternative to yellow chromate coating agents containing Cr(VI)
- Colour shade adjustable, depending on the concentration, from iridescent to yellow.
- Stable even in the event of a high degree of contamination by foreign metals
- Integrated iron inhibitor
- Economical way of working due to low make-up concentration

Obtain information also about further products from our product portfolio, e.g. OPAL (alkaline zinc-nickel), TOPAS 3100 (alkaline zinc and/or zinc-iron) and our PROSEAL series (passivation systems).

Should you have any further questions, our competent field service will be at your disposal.
