

SURFASEAL WL 150

The **SURFASEAL** series is a very economical sealing system developed especially for high corrosion protection of zinc and zinc alloys.

Our **SURFASEAL WL 150** is a **polymer and silicate-based sealing agent** which considerably increases the corrosion protection of passivated surfaces.

Advantages of SURFASEAL WL 150:

- Provides passivated and chromatised parts with exceptionally high corrosion protection.
- Especially for the extraordinarily high corrosion protection in the automotive and window construction industries
- Outstanding ductility, no tearing of the layer.
- Due to the 2-component system the runoff speed can easily be adjusted.
- As a result very easily adjustable for drum and rack application.
- Self-healing effect of the layer.

AZUR HT 4 + PROSEAL XZ 111 + SURFASEAL WL 150

Also obtain information about other products from our product portfolio, e.g. AZUR HT 5 (acid zinc), TOPAS 4100 (alkaline zinc or zinc-iron), OPAL (alkaline zinc-nickel), JADE (acid zinc-nickel) and our PROSEAL series (passivation systems).
